(54) Title: **AUTOSTEREOSCOPIC DISPLAY**

(57) Abstract: An autostereoscopic display device comprises a display array with addressable pixels. The display device comprises a means for providing collimated light (60) emitted by the pixels of the display array (61), and a cylindrical lens (63) for focusing the image displayed on the display array on a display screen (66). A scanning means (64) is provided to sequentially scan over said display screen, and means (69) for changing the image information on the display array (61) in a rate corresponding to the frequency of scanning of the openings in the display screen are also provided.
